

Oracle DBA

Shazam is the leading provider of music discovery services globally. Many people are aware of the Shazam application on the iPhone and the Blackberry phones as well as the 2580 service in the UK. Shazam also works with major handset manufacturers and network operators to provide innovative and feature rich client applications worldwide. All these features are integrated with the Web, which enables users to view and share their tag lists, browse and buy music-related information. Shazam envisions the user tags to be accessible through social networking sites like Facebook, Twitter and Myspace.

As a fast paced and forward thinking company, we demand a lot from our talented and leading-edge team and reward them with interesting work, lots of room to develop their talent, and a fun environment to work in. If you think you would like to be part of our smart and energetic team, then apply today.
