

Shazam

Shazam is the world's leading mobile music discovery application, enabling consumers to experience and share music with others across mobile devices and the internet. With more than 35 million end-users since its launch as the first mobile-specific service to help consumers discover and share new music.

Headquartered in London England, Shazam's solutions enhance the music strategies of more than 75 carriers across 60 markets globally, including AT&T, T-Mobile and Vodafone. Its mobile products on iPhone, Android, Blackberry and Windows Mobile platforms are the acknowledged leader in music recognition and discovery.

Shazam's successes have been recognised through numerous awards, including the Mobile Entertainment Award for Best Music Service Provider.

Role Specific

Senior Product Manager

Due to expansion of this company's business, Shazam is seeking a Sr. Product Manager. This position will be responsible for end-to-end product management, from product strategy and roadmap through product launch, of Shazam's leading mobile products and web site. The individual must have a strong track record of managing consumer Internet products used at a massive level on a global scale. This role will work in concert with UI design, engineering, business development and other teams within the business to deliver high quality work in a timely manner with a high attention to detail.

The ideal candidate is an excellent communicator, quick learner, and is passionate about music. This role reports to the VP of Product Marketing.

Responsibilities & Deliverables

The following are the key deliverables expected of the successful candidate.

- Develop and communicate a cohesive product strategy and roadmap
- Write business and product requirements in the form of Product Requirement Documents (PRDs)
- Collaborate with the UI design, business development, marketing and engineering teams on PRDs, use cases, UI specs, development schedules and launch plans
- Assist the engineering team in the resolution of issues during development, modifying scope documentation, raising change requests and updating product documentation if necessary
- Coordinate with external partners on product releases and represent the Shazam product team with key partners
- Management of application localization process (Translation & QA) with external agencies
- Co-ordinate the communication of launch feature scope and customer benefits and ensure they are clearly explained to internal stakeholders
- Work with QA to ensure issues discovered in User Acceptance Testing are prioritized with

other issues

- Resolve any issues during the in-life phase immediately after launch, working with customer services to act on customer feedback and modify products in-life where necessary
- Multi-task multiple product lines across different platforms, devices and languages
- Evaluate existing and new products to provide constructive ideas for change

Qualifications & Experience

This job requires the following qualifications and experience.

- Minimum of 5 years experience as product manager for massively adopted consumer Internet services, ideally for mobile devices on a global scale
- Bachelors Degree (Computer Science, preferred)
- Outstanding body of work demonstrating high quality, innovative deliverables and an exceptional understanding of consumer Internet behavior
- Deep understanding of prominent Web and mobile platforms
- Strong experience presenting and collaborating on product design with cross-functional teams
- Capable of interacting with partners and other external parties in a professional and polished manner
- Ability to understand technical concepts
- Strong fluency with Microsoft Office
- Familiarity with collaborative tools such as wikis, bug tracking systems and commonly used corporate software
- Excellent command of oral and written English
