

Shazam

Shazam is the world's leading mobile music discovery application, enabling consumers to experience and share music with others across mobile devices and the internet. With more than 35 million end-users since its launch as the first mobile-specific service to help consumers discover and share new music.

Headquartered in London England, Shazam's solutions enhance the music strategies of more than 75 carriers across 60 markets globally, including AT&T, T-Mobile and Vodafone. Its mobile products on iPhone, Android, Blackberry and Windows Mobile platforms are the acknowledged leader in music recognition and discovery.

Shazam's successes have been recognised through numerous awards, including the Mobile Entertainment Award for Best Music Service Provider.

Role Specific :

Senior User Interface Designer, Mobile

Due to expansion of this company's business, Shazam is seeking a Sr. User Interface Designer. This position will be responsible for the end-to-end user interface definition, from concept through interaction design and visual design, for Shazam's industry leading mobile products. The individual must have a strong track record of designing compelling and engaging consumer Internet mobile products used at a massive level on a global scale. This role will work in concert with product management, engineering and other teams within the business to deliver high quality work in a timely manner with a high attention to detail. The ideal candidate is an excellent communicator, quick learner, has an amazing eye for aesthetics and is passionate about music. This role reports to the VP of Product Marketing.

Responsibilities & Deliverables

The following are the key deliverables expected of the successful candidate.

- Define the user interface for Shazam mobile applications via delivery of interactive prototypes, wireframes, mock-ups, design specifications and graphical assets
 - Collaborate with the product management, business development and engineering teams on use cases, Product Requirement Documents, and business requirements to craft user interface specifications
 - Ensure designs fit within the technical & UI frameworks of various mobile platforms
 - Multi-task multiple product lines across different platforms, devices and languages
 - Evaluate the usability of existing and new products to provide constructive ideas for change
 - Coordinate usability studies with researchers and translate findings into product improvements
 - Ensure product designs align with overall brand guidelines
- Qualifications & Experience

This job requires the following qualifications and experience:

- Excellent experience designing user interfaces for massively adopted consumer Internet services, ideally for mobile devices on a global scale
- Degree in HCI, product design, interaction design or equivalent field
- Outstanding body of work demonstrating high quality, innovative deliverables and an exceptional understanding of fundamental design disciplines & principles (e.g. typography, information architecture, color, usability, etc)
- Deep understanding of UI Guidelines for prominent mobile platforms
- Strong experience presenting and collaborating on design with cross-functional teams
- Capable of interacting with partners and other external parties in a professional and polished manner
- Ability to understand basic technical concepts as they relate to UI design
- Strong fluency with Photoshop, Illustrator, OmniGraffle and other design software
- Fluency in creating Flash prototypes
- Familiarity with collaborative tools such as wikis, bug tracking systems and commonly used corporate software
- Excellent command of oral and written English

Candidates must hold a valid UK work permit and be prepared to travel outside the UK.
